

PRESS RELEASE

13th October 2021

Copia Capital portfolios now available on Funds Network

LONDON, 13th October 2021 - Discretionary Fund Manager Copia Capital Management is delighted to announce that its portfolios are now available on the [Funds Network](#) platform, owned and backed by Fidelity International.

More than 5400 advisers who use the Funds Network platform will now have access to Copia's range of portfolios.

With the addition of Funds Network, Copia's range of portfolios is now available across 12 fund management platforms giving a growing number of advisers access to Copia's innovative [DFM services](#).

Copia is experiencing particular growth in demand for its MPS Custom services where it works with advisers to create bespoke portfolios, giving them all the benefits of a personalised investment strategy for their clients, whilst taking the risk and administrative burdens away from their business, and providing support for their marketing.

Commenting on the announcement, Copia's managing director Robert Vaudry said: "We're delighted to have added our twelfth platform, making the benefits of Copia's DFM services and portfolios available to Funds Networks' adviser client base. As part of our growth strategy, and in response to adviser requests, we will continue to add further fund management platforms over the coming months."
