**Outcome Charts**

## Market performance

- August proved to be a month of two halves with equity markets rallying at first only to reverse course and fall lower. Like July, markets rose on the perception that inflation was peaking, and that Central Banks were likely to pivot to cutting interest rates. The summer rally ended abruptly when Fed Chairman Jerome Powell gave a hawkish speech at the Jackson Hole symposium on August 27th. He made it clear that fighting inflation was the Fed's top priority and that even if some "pain" is required, the central bank would continue to raise interest rates and shrink its balance sheet "for some time." Equity markets fell after the speech with US stocks finishing the month meaningfully lower while most other developed and emerging market indices were down modestly (in local currency terms).
- Bond markets were not spared in August as investment grade and high yield bond prices fell over the period. The selloff was particularly acute in the United Kingdom due to worries that the economy was falling into recession at a time where inflation is surging toward post-war highs. Some gilts saw far heavier selling than U.S. or European bonds over the month as a sharp decline in the value of sterling and doubts over the ability of Britain's next prime minister to handle the growing economic crisis added to strains on investor confidence.
- Commodity market returns were mixed over the month. Natural gas prices surged in August due to ongoing supply issues and statements from Russia indicating that prices could rise even further (up to 60%) over the winter months. This resulted in record high electricity prices in the UK and Europe which is only expected to worsen in the coming months. Agricultural commodity prices also rose as heat waves and draughts across regions hurt crop yields. On the other hand, oil prices and other hard commodities fell over the period on the view that a global economic slowdown would reduce demand.
- Investors are slowly coming around to the view that inflation may stay higher for longer and that the likelihood of recession is increasing. It also appears that Central Banks are more willing to accept some level of economic pain to achieve the goal of bringing inflation back to more acceptable levels. Given this backdrop, we believe that volatility and downside risks are likely to remain elevated and that a more cautious stance is warranted for the time being.

**Notes:**

Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates.

The performance of each asset class is represented by relevant indices and expressed in GBP terms, which are selected by Copia Capital Management. Reference to a particular asset class does not represent a recommendation to seek exposure to that asset class. \*Maximum Return Drawdown is defined as the largest single drop from peak to trough of the value of an asset class or portfolio over any timeframe within the stated period. This information is included for comparison purposes for the period stated, but is not an indicator of potential maximum loss for other periods or in the future.

**Portfolio Performance**  
**Outcome Charts**

**-0.72**

As of 29-July-2022

**-0.69**

As of 31-Aug-2022

Based on our proprietary Prediction Algorithm the Copia Risk Barometer is reading -0.69 as of 31-August-2022, a change of +0.03 from last month, staying in the Red zone, indicating that the global economic outlook continues to be negative.

## Primary drivers for the Risk Barometer:

- **Government bond markets:** Major global yield curves continue to be heavily inverted following a steep shift upwards in the UK curve over the last quarter. This is a cautionary signal from the bond markets suggesting the liquidity fuelled rally in risk assets is coming to an end. Historically recessions have followed 9 out of 10 times, 18 months from the point when the yield curve inverts and remains in inversion.
- **Equity market pricing:** Economic growth expectations have been lowered going forward as companies start to feel the pressure from supply chain issues, rising inflation and stalling growth. Geopolitical uncertainty remains high and equities are likely to remain volatile in the near term. Markets have also lost its long term positive momentum and are very close to bear market territory. While this score has improved following the recent market rally and this is reflected in the risk barometer score it is still a cautionary signal.
- **Credit Spreads:** The tight credit spreads which had underpinned positive sentiment in risk assets all through 2021 have materially expanded. Rising Credit Default Swap indices indicate corporate bond investors have now started to price in a probability of an inflation/Fed induced recession. Although these levels are not comparable to those seen during the Covid recession, the spreads have materially widened compared to levels seen over the last few months.
- **Overall:** The Risk Barometer is picking up much more negative signals than positive ones and is indicating a negative outlook toward risk assets. Volatility is likely to persist and if these conditions continue, economic growth outlook will be challenging for the rest of 2022.

Note: The Risk Barometer score varies between -1.0 and +1.0. A score of -1.0 indicates an extremely poor economic outlook, which is accompanied by a high probability of negative returns in risky asset classes. A score of 0 indicates a neutral economic outlook with almost equal probability of positive and negative returns in risky asset classes. A score of +1.0 indicates an extremely positive economic outlook, which is accompanied by a high probability of positive returns in risky asset classes.

## Risk Barometer history

- The top chart shows the market performance (best and worst returns) during different Risk Barometer regimes.
- The bottom chart shows how the Risk Barometer has moved between different regimes and the triggers for regime changes.
- The Risk Barometer is a forward-looking quantitative model that provides a systematic rules-based approach for dynamic risk management.

Note: The Risk Barometer score varies between -1.0 and +1.0.

A score of -1.0 indicates an extremely poor economic outlook, which is accompanied by a high probability of negative returns in risky asset classes.

A score of 0 indicates a neutral economic outlook with almost equal probability of positive and negative returns in risky asset classes.

A score of +1.0 indicates an extremely positive economic outlook, which is accompanied by a high probability of positive returns in risky asset classes.

Source: Copia Capital Management, Refinitiv Datastream

Global Equities Returns is based on actual data of MSCI World Index for the period between 31-Dec-2016 and 31-Aug-2022.

## Impact of dynamic risk management using the Risk Barometer

- Objective is to achieve similar levels of returns, with a narrower dispersion of returns (reduced tail risk)
- Can enhanced risk-adjusted returns
- Can deliver a smoother investment journey whilst mitigating downside risk
- We evaluate impact using a theoretical 60/40 portfolio with and without the Risk Barometer

	Annualised Return	Annualised Volatility	Sharpe Ratio	Maximum Drawdown
60/40 Portfolio	5.69%	8.52%	0.67	-25.40%
60/40 Portfolio with Tactical Tilts	5.81%	7.40%	0.79	-19.13%
Impact	→ 0.11%	↓ -13.24%	↑ 17.58%	↓ -24.68%

Note: 60/40 Portfolio consists of 60% allocation to MSCI World Index and 40% allocation US 10 year Bond Index rebalanced monthly. Figures are based on historic actual figures in GBP terms for the period 31-Jan-2000 and 31-Aug-2022. All return figures are before fees.

The 60/40 Portfolio with Tactical Tilts consists of dynamic allocation to MSCI World Index within a range of 40% to 60% driven by the Risk Barometer. The portfolio is rebalanced monthly and remaining allocation is to US 10 year Bond Index.

Copia Volatility Focus Portfolios

Our 'Select Volatility' portfolio was previously known as 'Volatility Focus'.

*For illustration only.  
Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates.*

Outcome (risk-return) analysis as of 31 August 2022

Our 'Select Accumulation' portfolio was previously known as 'Select'.

*For illustration only.  
Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates.  
The annualised risk and return figures are calculated based on a historic 5 year period as of 31-Aug-2022.  
The performance figures for Select ESG portfolios include simulated data before the inception date of the Select ESG portfolios (31-Mar-2020).*

Outcome (cumulative return) analysis as of 31 August 2022

Our 'Select Accumulation' portfolio was previously known as 'Select'.

*For illustration only.*

*Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates.*

*Available CPI data has been used as a comparator for real returns. CPI data for Aug 2022 is currently unavailable and not shown.*

**The cumulative returns are calculated based on the period from the inception date of the Select Accumulation portfolios (31-Oct-2016). The performance figures for Select ESG portfolios include simulated data before the inception date of the Select ESG portfolios (31-Mar-2020).**

Outcome (annualised return) analysis as of 31 August 2022

Our 'Select Accumulation' portfolio was previously known as 'Select'.

*For illustration only.*

*Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates.*

*Available CPI data has been used as a comparator for real returns. CPI data for Aug 2022 is currently unavailable and not shown.*

**The annualised returns are calculated based on a historic 5 year period as of 31-Aug-2022.**

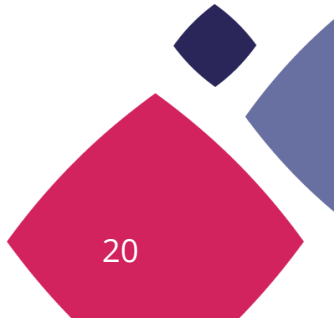

**The performance figures for Select ESG portfolios include simulated data before the inception date of the Select ESG portfolios (31-Mar-2020).**

Outcome analysis as of 31 August 2022

Our 'Select Decumulation' portfolio was previously known as 'Retirement Income'.

*For illustration only.  
Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates.  
Performance includes simulated performance for data prior to launch date (28-Feb-2017). Actual data is used from 1-Mar-2017 to Present.*

Outcome analysis as of 31 August 2022

Our 'Select Thematic' portfolio was previously known as 'Copia Enhanced Equity'.

*For illustration only.*

*Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates.*
